

Hello,

I get this question almost every day. “I have a prescription for physical therapy but my doctor wants me to go somewhere else, can I come to Montgomery County Rehabilitation and Sports Therapy?” (Spoiler alert; Yes)

It can be confusing when your physician suggests you go somewhere else for physical therapy. Why would he or she do that? There may be lots of reasons. One reason may be; They honestly don't know the quality of care and the great results you already know you'll get at Montgomery County Rehab and Sports Therapy.

YOU HAVE A CHOICE WHEN IT COMES TO CHOOSING YOUR PHYSICAL THERAPY

Just as you can fill a prescription for medication at a pharmacy of your choice you can choose where to receive your physical therapy.

When you are in pain and need relief it can be a little nerve racking going somewhere completely new or to someone you've never seen before. But coming back to Montgomery County Rehabilitation and Sports Therapy you'll be treated like a family member by people you already know and trust. You know exactly how your treatment will be set up, you know that our staff is here to help you at every step of the way and you know the kind of great results you'll get.

If your doctor is concerned about clear and easy lines of communication... There is never any doubt your physician is up to date on your progress. We communicate with your referring physician on an almost weekly basis during your care with reports, success stories and a final testimonial. We are always available to talk with your physician at any time.

If your doctor is concerned about the expertise of our physical therapists... You'll receive care from our staff of experts that are constantly improving their knowledge and skills through additional cutting edge training and education. It's actually a requirement to work here!

If your doctor is concerned about you having convenient appointment times... We have extended hours from 7 AM to 7 PM. We don't want you missing work or school.

If your doctor is concerned about making sure you get the results he wants you to have... You'll get the results YOU want because we ask specifically “What is it YOU want? What are YOUR goals?”

If your doctor is concerned about the physical therapy process going smoothly... We go the extra mile to make sure you get what you need including payment plans and flexible scheduling.

Taking good care of yourself means being your own boss. So remember, regardless of ANY physician or hospital you use, you can choose where to receive your physical therapy. Don't worry about going to physical therapy somewhere else if you've decided we are the best fit. You have the right to choose, we'll make sure your doctor is glad you did.

In the end, you'll get great care at MCR. How do I know that? Our past patients have told us for the last 25 years...

- At least 75% of people we treat are former patients or have been referred by former patients

So if you find yourself feeling unsure or awkward with your doctor when needing physical therapy then call me. You can even call me from your doctor's office if you like. I'm sure I can help you sort it out in a discreet and respectful manner.

Sincerely

Michael Giuliani, MPT

P.S. Your health is your responsibility. You are your best advocate, so choose your physical therapist wisely.
